# Introduction to Cryptocurrency

Cryptocurrency, sometimes called crypto-currency or crypto, is any form of currency that exists digitally or virtually and uses cryptography to secure transactions. Cryptocurrencies don't have a central issuing or regulating authority, instead using a decentralized system to record transactions and issue new units.

The Crypto industry as a whole has seen a momentous year of growth, heavily spurred on by the entrance of institutional investors adopting Bitcoin due to its store of value properties. In 2020 Crypto experienced was also accelerated by its global adoption, as the number of global crypto users reached 300 million in June 2021. In the aftermath of COVID-19 and the acceleration of Blockchain adoption across the world, it is also predicted that the Metaverse Industry is to expand further within both the Virtual Reality (VR) and Non-Fungible Token (NFT) sectors. According to Strategy Analytics (Global Research Company), the global metaverse market is projected to reach \$280 billion valuation by 2025.

# POLYGON TECHNOLOGY

Polygon believes in Web3 for all. Polygon is a decentralised Ethereum scaling platform that enables developers to build scalable user-friendly dApps with low transaction fees without ever sacrificing on security.

Polygon combines the best of Ethereum and sovereign blockchains into a full-fledged multi-chain system.

- It is able to fully benefit from Ethereum's network effects.
- It is inherently more secure.
- It is more open and powerful

# HYBRID TOKEN

Hybrid token in the Polygon blockchain will emerge as an important asset class. These tokens have all the advantages that blockchains and Polygon have to offer in terms of transparency in total number of coins, owners, minting, fast confirmation times, transactions details and smart contract execution. Tokens on the Polygon blockchain can serve several different functions.

Hybrid tokens follow the Decentralized ecosystem. The first token we launched was an ERC20 token backed by Matic (MATIC) and will be appropriately named, "Hybrid Token" (HBD). Unlike decentralized solutions HBD will be fully accounted for and proof of reserves posted on the MATIC chain. It has a transaction speed of 10,000 TPS.

# WHAT IS METaverse

The Metaverse is the bridge between physical and virtual worlds within the decentralised and open source virtual world. Cryptographic protocols will emerge for managing digital value, for example, digital art, real estate & advertising space. The facilitators that make this happen will be NFT's on the Polygon Network allowing for affordable and rapid transactions

## Virtual Land

Virtual lands are digital spaces or land plots that you can buy, sell, build upon, and explore in a virtual world.

## NFT Avatar

Lets people buy 3D avatars as NFTs and use them across multiple virtual worlds and streaming applications like Zoom.

## VR Games

VR game is a video game played on virtual reality hardware. Most VR games are based on player immersion, typically through head-mounted display unit or VR headset and one or more controllers

# ROADMAP

2022  
Q3

- Hybrid Token Launch
- Website launch
- Whitepaper 1.0
- ICO private sale started at 0.00625 USD

2022  
Q4

- Metaverse planning
- Gather developers and designers in company
- ICO public sale will start in 0.0125 USD

2023  
Q1

- Hybrid Token listing in major exchanges
- The graph implementation for transparency
- Profile implementation

2023  
Q2

- Metaverse development
- Virtual land trading
- Plan and execute NFT's avatar in Metaverse
- Plan to Metaverse gaming projects

The background features a dark blue gradient with a large, rounded rectangular shape in a slightly lighter shade of blue. On the right side, there are several overlapping, semi-transparent geometric shapes in shades of orange, pink, purple, and blue, creating a dynamic, layered effect. A wavy, light blue shape is visible at the bottom left corner.
